PROVEN STUD CONTRACT

"Yu-Jin" (AKC registered as Gan-Ji of Big Eyes Love)

Date of Contract: ___/___/___ Date Mated: ___/___/___ Estimated Due Date: ___/___/___

Name of Dam: _____ Owner of Dam: _____

TERMS OF CONTRACT (TRADITIONAL LIVE COVER):

- The fee for this service is a \$100 service charge (non-refundable, paid at booking), plus \$1900 at time of service for a total of \$2000. A "pick of the litter" option can be negotiated for an AKC Maltese litter only. Please discuss/negotiate this with Mollie's Maltese upon initial contact, as circumstances/geography may affect this for either or both parties.

MM Initial: _____ Customer Initial: _____

TERMS OF CONTRACT (ARTIFICIAL INSEMINATION or AI):

- The 2024 fee for this service is \$2000 plus collection/shipping, including a \$100 booking fee (non-refundable, but is transferable to balance). Customer will receive viability evaluation/certification, brucellosis screening, collection, and one fresh/chilled overnight shipment. If additional collections or shipments are requested, there will necessarily be an upcharge for the additional vet visit(s) and shipping, but the \$2000 fee to Mollie's Maltese is a one-time charge. AI is widely used and has high success rates. Click [here](#) for more. Shipping costs vary based on location.
- \$100 booking fee due upon reservation. \$900 due on or before date of collection/shipment. \$1000 balance due upon first receipt of specimen to female owner by end of business day (EST). AKC information sent after Mollie's Maltese has received the final balance. **If Dam is not AKC registered, full payment will be required as security before shipment, as dam owner will need no AKC info sent after shipment.** Dam owner welcome to contact our repro vet, [Infinity Canine](#), for verification prior to payment and/or request video call from us at the vet's office, either or both as your security for your payment. Collection/Shipping costs are paid directly to Infinity Canine.
- Mollie's Maltese is not responsible for a failed pregnancy with this method.* Veterinary protocols on our end will have been followed precisely (specimen viability would have been verified by vet, along with being shipped in special shipping container provided by the vet). We STRONGLY encourage dam owner to perform progesterone testing to heighten the likelihood of conception. The customer is guaranteed a viable specimen from our proven stud, and for these reasons, the stud fee is non-refundable.
- Other registrations may be considered on a case-by-case basis. Please call.

MM Initial: _____ Customer Initial: _____

STUD OWNER (MOLLIE'S MALTESE) AGREES TO:

1. Provide the owner of the dam proof of stud AKC registration.
2. Have the stud dog in good physical condition, current with vaccinations, and a clear Brucellosis test.
3. Take normal, adequate care of the dam while in our charge. Boarding (if requested) included up to 3 days. Though extremely unlikely, any veterinary emergency requiring a vet visit (not associated with breeding) while in our care, will be at the dam owner's expense. Mollie's Maltese would contact dam owner immediately should this unlikely incident occur. *None of this is applicable for the AI option, though, as there will be no actual contact. If traditional method is not utilized, video call will be provided by appointment by request.*
4. Provide any and all AKC information necessary for litter registration, returning to dam owner (within agreed-upon timeframe), as applicable.
5. Ensure a goal (not a guarantee) of at least 2 ties (traditional live cover) but is wholly dependent on the both the male *and* female dog's cooperation. Yu-Jin is proven, but the timing of mating is imperative. Mollie's Maltese will strive to reach this goal but cannot be held responsible for a tie failure if all proper protocols are followed. *If there is no tie, the stud fee (minus the deposit and boarding fee) will be refunded.*
6. Provide one return stud service (at dam's next heat cycle) of the same stud to the same dam if no pregnancy results from the first mating at no additional charge. To qualify, the dam owner must notify Mollie's Maltese of failure to conceive, in writing, not more than 70 days following the mating. *This is not applicable for AI option.*
7. Provide the dam owner with a written receipt for the stud service (with date(s) if applicable).

MM Initial: _____

Customer Initial: _____

FEMALE OWNER AGREES TO:

1. Provide proof of AKC registration before servicing (as applicable).
2. Provide veterinary certificate of current annual vaccinations, including Bordetella (kennel cough), and a clear Brucellosis test. *This is not applicable for the AI option.* Embark genetic testing is also an important step.
3. Discuss any matters of concern regarding the genetics of either dog with Mollie's Maltese representative.
4. Send the dam in good health and in season (or to order the artificial insemination during a time when dam is in season). We understand timing is important when breeding! All interested traditional clients must give Mollie's Maltese a window of time (e.g. "around the first few weeks of May") during which stud services are needed, making an appointment for a specific date and time at least 72 hours in advance. *This is not applicable for the AI option, though (again) the order must be placed understanding the time frame during which specimen can be used to create a pregnancy. Again, we **strongly** recommend the dam owner initiate progesterone testing with her vet to ensure mating will happen on the "best" day. Otherwise, Mollie's Maltese will make a recommendation for the breeding date(s), but cannot make a guarantee the dam is fertile as multiple factors are at play with a dog's heat cycle and fertility. Mollie's Maltese cannot be held responsible for a dam's fertility or lack thereof.*
5. Notify stud dog owner/agent, in writing, no later than 70 days after traditional mating if no pregnancy results from the mating. Failure to do so will result in no return service being provided.
6. Keep the dam properly confined following the breeding to ensure no other dog could mate with her accidentally before mating season is finished.
7. Agrees to not knowingly sell or transfer puppies whelped as a result of this mating to any person or firm connected with the business of resale or wholesale of dogs.

MM Initial: _____

Customer Initial: _____

OTHER CONDITIONS:

1. One puppy born alive or dead constitutes a litter. However, if only one puppy results from this traditional mating, a return service will be provided at no charge to this same dam at her next heat or within one year, provided all conditions of this contract have been met (*not applicable for the AI option*).
2. If the dam fails to conceive after a return service (traditional method), this contract is terminated.

First & Last Name of Client (please print): _____

Address to which AKC registration papers should be mailed (don't forget the ZIP code):

Date of anticipated exchange (MM/DD/YYYY): _____

I have read the entire stud policy and agree to its statutes, having initialed each section, verifying my understanding of each section. I understand that Mollie's Maltese will uphold their end of this agreement and I will uphold my end. I understand the \$100 service fee is non-refundable for any reason, including a change of mind. I have asked all questions necessary to feel comfortable with this agreement and have seen all of the documentation (Embark testing results, etc.) necessary to feel comfortable with this agreement.
